

## Essential DAK1K2

### Why This Supplement?

Most people are deficient in four major nutrients, which have gone unnoticed for so long that they need a therapeutic dose to help the body recover and reach optimal health. Vitamin D is essential to the health of most organs, including the brain, heart, skin, reproductive glands, prostate gland, and mammary glands. Vitamin A helps protect your eyes from night blindness and age-related decline. It also supports a healthy immune system and has been shown to help protect from certain cancers. Vitamin K plays a vital role in blood clotting, bone metabolism, and regulating blood calcium levels.

### What Sets Us Apart?

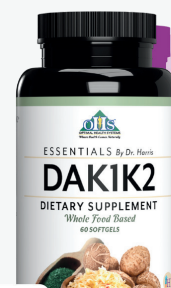

Just like your Health Professional, Optimal Health Systems cares about patients, which is why we exclusively create supplements with nutrients derived from whole foods—not cheap, synthetic alternatives. Rest easy, knowing you're getting the best nutrition possible.

### The Results!

DAK1K2 provides a therapeutic dose of four major nutrients people are often deficient in.

### Quick Facts!

- Is known to correct related nutrient deficiencies
- DAK1K2 helps improve overall health and help strengthen the body's immune system.
- Vitamin K2 helps protect you from osteoporosis, heart disease, cancer, and more. It helps take calcium out of the blood and back into bones.
