

Essential Fulvic Mineral

Why This Supplement?

This formulation addresses two critical issues resulting from our modern, industrial farming system: First, it adds back vital nutrients that have been depleted from our soils and are, therefore, lacking in our foods. Second, fulvic acid works directly to bond with and remove glyphosate, the chemical pesticide that has become pervasive in our environment

What Sets Us Apart?

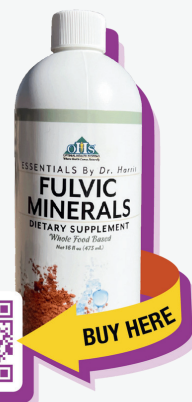

Just like your Health Professional, Optimal Health Systems cares about patients, which is why we exclusively create supplements with nutrients derived from whole foods—not cheap, synthetic alternatives. Rest easy, knowing you're getting the best nutrition possible.

The Results!

By chemically bonding with toxins like glyphosate, fulvic minerals support your body's natural detox process, allowing you to remove toxins before they're absorbed into tissues and organs. Trace minerals also improve digestion and metabolism, ensuring your body gets the most from your food—just one tablespoon a day does the job.

Quick Facts!

- Fulvic acid helps detoxify the body by binding to compounds like glyphosate, heavy metals, and other toxins, which facilitates their removal.
- Fulvic minerals have anti-inflammatory properties, which may help with allergies, eczema, inflammatory diseases like diabetes, and neurodegenerative disorders.

Dosing

Take 2 tablespoons once a day, or as directed.
