

OPTIMAL CHEMZYME

THE ULTIMATE ENZYME FORMULA FOR MODERN LIFE

Chemzyme is a revolutionary formula developed to address the alarming increase in food additives and harmful chemicals, particularly phthalates, found in the modern diet. As food processing has intensified, so has the presence of these toxic substances, turning many so-called healthy foods into potential health hazards. Chemzyme helps to detoxify these harmful compounds, allowing your body to fully benefit from the nutrition you eat.

HOW DOES IT WORK?

Chemzyme provides the body with essential enzymes, including:

- **Phthalazyme:** The first and only enzyme specifically designed to digest and detoxify phthalates
- **Peptidase:** Breaks down proteins that cause gastrointestinal issues and blood clumping.
- **Di-Peptidyl Peptidase:** Digests gluten, helping to alleviate symptoms of non-celiac gluten intolerance.
- **Lactase:** Assists those with lactose intolerance in digesting dairy products.
- **Phytase:** Neutralizes phytic acid in legumes, wheat, and nuts allowing for higher nutrient absorption.

HOW DO YOU TAKE IT?

Take 2 capsules daily, 1 mid-morning and afternoon, or as directed.

SUGGESTED NUTRITIONAL SUPPORT USES

- | | |
|--------------------------------|----------------------------|
| - Detoxification of phthalates | - Support for gut health |
| - Enhanced nutrient absorption | - Improved energy levels |
| - Reduced food sensitivities | - Promoting mental clarity |

WHY IS THIS SO IMPORTANT?

These chemicals, found in almost every food, water supply, and cosmetic today, PHTHALATES have been linked to severe health risks, including hormone and endocrine disruption, reproductive issues, and major behavioral and brain issues, ex. ADHD. **Chronic exposure to phthalates and other chemicals is nearly unavoidable, making detoxification critical for maintaining long-term health**

DETOXIFY AND PROTECT YOUR BODY WITH CHEMZYME'S FORMULATION

Chemzyme is a new “everyday” formula created out of necessity due to the heavy processing of foods created by the major food companies that are owned by big pharma and holding companies.

Foods, especially in America, are laden with chemicals and ingredients that turn many healthy foods into damaging, disease-causing compounds. This has led to major confusion amongst consumers as to what foods are actually healthy and lead to optimal health versus which ones lead to low energy and disease.

Chemzyme addresses all of the major food allergens and problems by adding back the necessary enzymes needed to break down the chemicals. This includes the creation of the world's first compound to digest Phthalate chemicals.

SUPPLEMENTING WITH CHEMZYME HAS BEEN SHOWN TO:

Detoxifies Phthalates & Forever Chemicals:

Breaks down harmful chemicals linked to serious health issues like asthma, ADHD, and fertility problems.

Supports Digestion:

Eases gluten and lactose intolerance, improving nutrient absorption from everyday foods.

Boosts Energy:

Enhances the body's ability to efficiently convert food into energy, promoting sustained vitality.

Strengthens Immune Function:

Supports a healthy gut, which is crucial for maintaining a strong and resilient immune system.

SUPPLEMENTING WITH CHEMZYME HAS BEEN SHOWN TO:

By incorporating Chemzyme into your daily routine, you arm your body with the tools it needs to combat the detrimental effects of phthalates and other harmful substances in your diet. This powerful enzyme formula helps ensure that the food you eat truly supports your journey toward optimal health and well-being.
