

# Fat Sugar Trim

## A DIGESTION SUPPLEMENT

We created this supplement with one mission in mind: to help your body effectively digest fats and sugars, turning them into the energy you need to conquer your day.

### Benefits:

- ✓ Uses lipase, a patented form of chromium, rosemary, and other herbs to help metabolize fat and sugar as energy.
- ✓ Contains ingredients specifically tailored to lower and stabilize blood sugar levels.
- ✓ Properly breaks down fats and sugar to avoid obesity, high cholesterol, and more.
- ✓ Fixes the real problem of poorly digested fats and sugars instead of trying to get rid of them once they are insufficiently digested.
