

Optimal Flora Plus

Why This Supplement?

Many factors in modern life can negatively impact our gut health, especially antibiotic use. Antibiotic means “against life,” which kills harmful strains of bacteria, as well as the beneficial strains we need for our health and well-being. You’re more susceptible to disease and illness when lacking in natural probiotics. Helpful flora is “probiotic,” which means “favoring life.” Our bodies contain approximately 3 lbs of friendly flora in the intestines.

What Sets Us Apart?

Just like your Health Professional, Optimal Health Systems cares about patients, which is why we exclusively create supplements with nutrients derived from whole foods—not cheap, synthetic alternatives. Rest easy, knowing you’re getting the best nutrition possible.
