

# Optimal Whole C

Complete formula containing all 4 parts of vitamin C, as nature intended.

As a well-known and important nutrient, there are lots of Vitamin C supplements on the market. We felt the need to develop our own because too many of those supplements are made from synthetic ingredients or incomplete formulations.

Whether you are treating a cold or defending against aging, Optimal Whole C keeps you covered with a complete, non-synthetic, natural source of Vitamin C combined with whole-food antioxidants.

**Potent, chewable vitamin C sourced from whole foods**

**Natural antioxidant to neutralize damaging free radicals**

**Nutritionally supports a healthy immune system**
